

EXP 17: Change Hardware compatibility of a VM (Either by clone/create new one)

which is already created and configured and run simple unix commands

Aim

To change the **hardware compatibility** of an existing Virtual Machine in **VMware Workstation** and verify its operation by running simple UNIX commands.

Procedure

Step 1: Open **VMware Workstation** and select the existing virtual machine.

Step 2: Power off the virtual machine if it is running.

Step 3: Click **VM → Manage → Change Hardware Compatibility**.

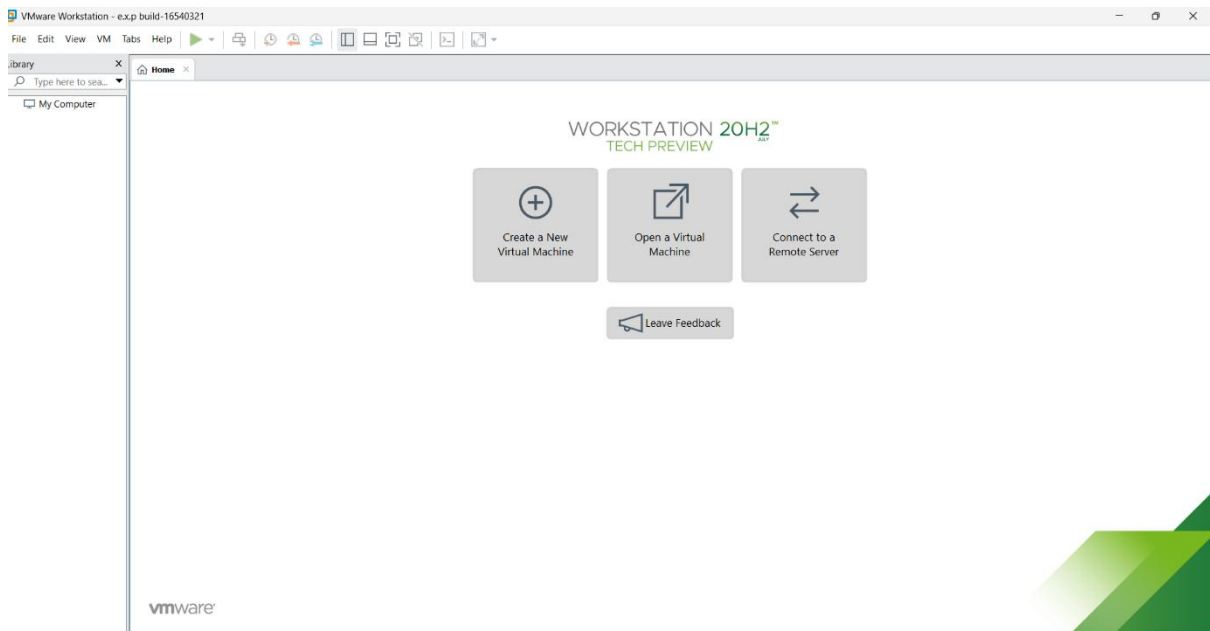

Step 4: Select the required hardware compatibility version and complete the wizard.

Step 5: Power on the virtual machine after the compatibility change.

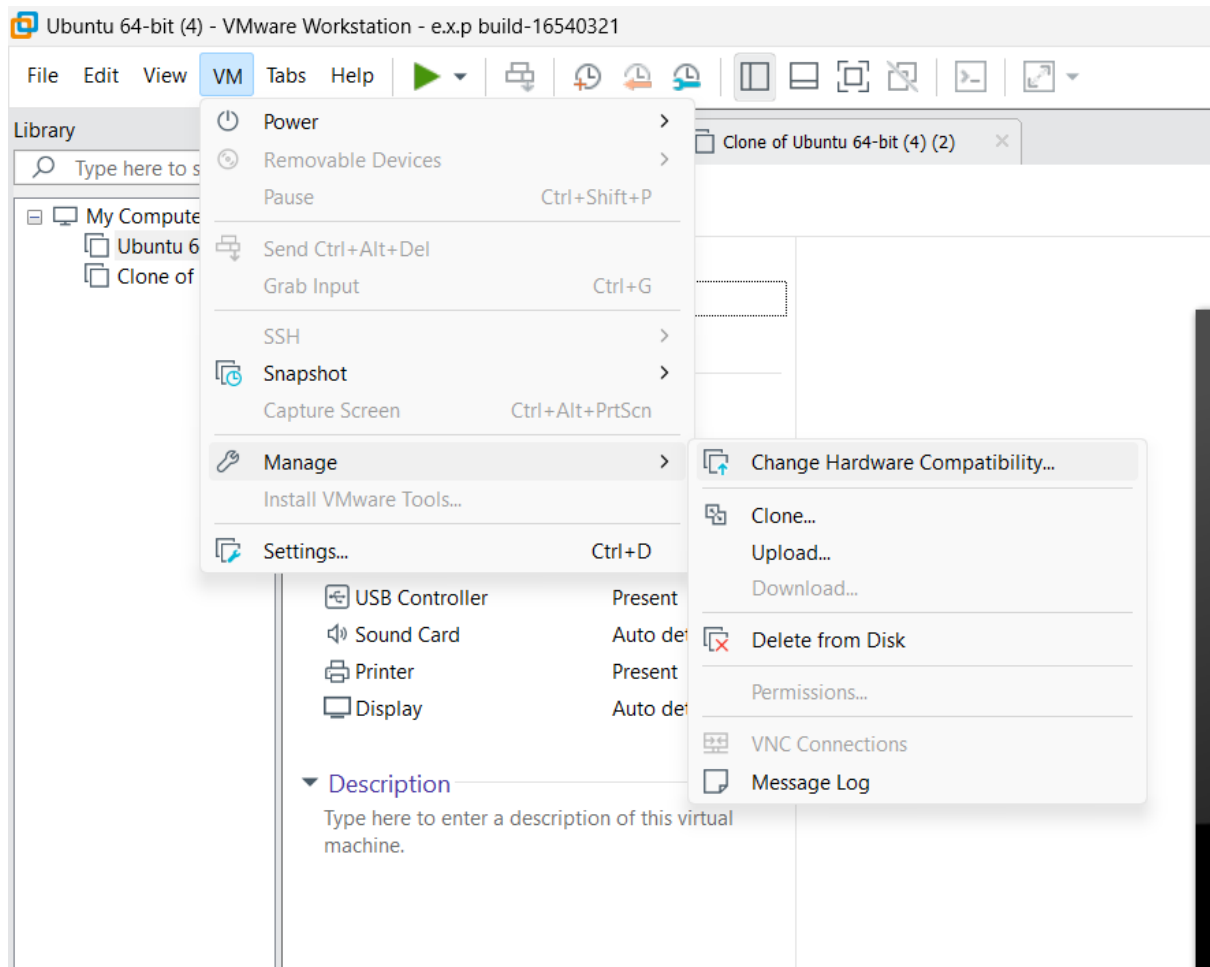

Step 6: Open the terminal and execute simple UNIX commands such as `pwd`, `ls`, and `date`.

Step 7: Verify that the virtual machine works correctly after the hardware compatibility change
