

Experiment: Library Book Reservation System for SIMATS Library

Aim:

To develop a simple Library Book Reservation System for SIMATS Library using Zoho Creator to demonstrate the Software as a Service (SaaS) model, enabling users to reserve and manage library books through a cloud-based application.

Procedure:

1. Log in to Zoho Creator and create a new application named SIMATS Library Book Reservation System.
2. Create a form and add the required fields such as Book Title, Author, Publication, Year, Edition, Number of Copies, Rack Number, Book Status, Student Details, and Reservation Date.
3. Configure field properties and create basic workflows for reserving, issuing, and returning books.
4. Save the form, enter sample book records, and verify the generated reports.
5. Publish the application to demonstrate cloud-based access using the SaaS model.
